PRESTASHOP THEME FOODHUB

Thank You For purchasing Prestashop Theme.

If you have any questions, please feel free to contact us via our theme contact form. Thanks again for your purchase.

<table>
<tr><td>**Step 1 : Installation**</td><td>Back to Top ^</td></tr>
</table>

Please, read the whole section, before attempting to install the theme.
IT IS RECOMMENDED TO ALWAYS BACKUP YOUR SYSTEM BEFORE MAKING ANY UPGRADES OR CHANGES !
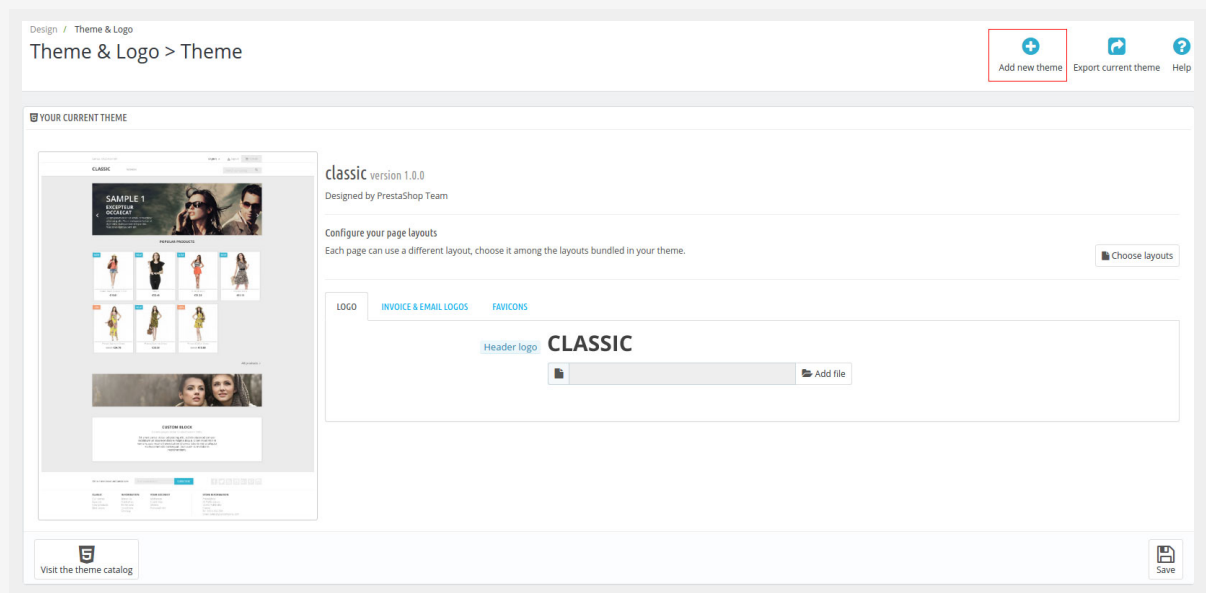

Theme installation steps:
To install theme on your server, follow the steps shown below
You can install theme by two way :

1.1 : Method - 1
Log in to your site Prestashop Admin panel, Go to **Design** > **Theme & Logo**.
Now click on **"Add new theme"** to add theme.

After that upload **"foodhub_Installer.zip"** (Provided in our Theme Package) in **"IMPORT FROM YOUR COMPUTER"** section as shown below and click on **"Save"** button.

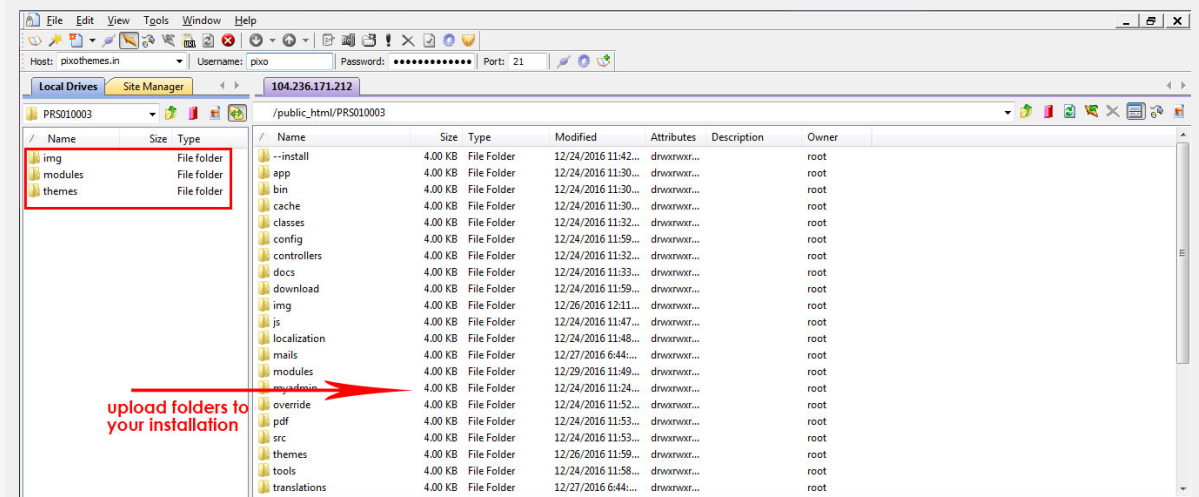

After that upload **"CMS images"** (Provided in our Theme Package)to **"your Installation img folder"** as shown below.
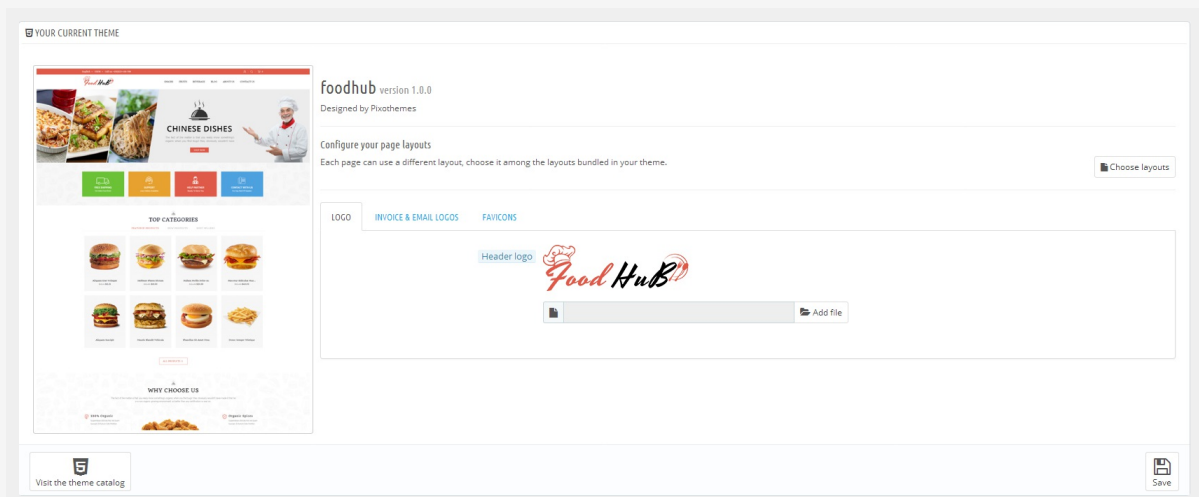

1.2 : Method - 2

Upload **img, modules, themes** folder(Provided in our Theme Package) to your prestashop root installation.

Step 2 : Activate Theme

Back to Top ⌃

Now to activate theme on your site from admin panel, Go to **Design** > **Theme & Logo**. Select our theme **"foodhub"** by clicking on **"Use this theme"**.

Now you need to configure few modules which will enhance your store and make it look like our live demo.

Go to **Modules > Modules & Services,** click on **Installed modules** tab and configure all the modules provided by Pixothemes.

</div>
</div>
</div>
</div>
</div>
</div>
```
After that Click on **"Save"** button.
3.15 : Ps Blog Management

Go to **Modules > Modules & Services** click on **Upload a module** at Top right corner.
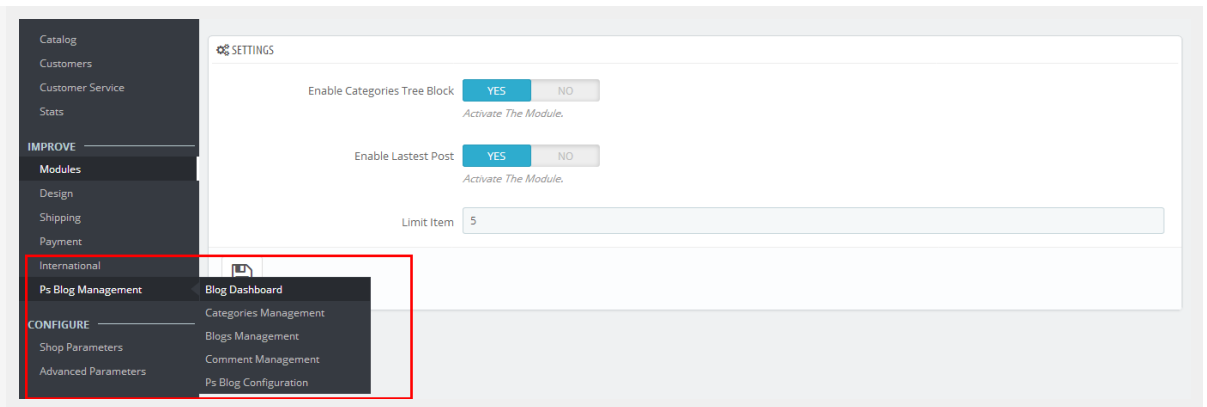

Upload **Ps Blog** module from theme package.

Also you can upload blog module via direct FTP by extracting blog module zip files from theme package to your prestashop insatllation **Module** folder
.

Ps Blog Management . Click on **"Configure"**.

After the module installed successfully, you can see the Ps Blog Management quicklink in the **"Left column"** at Admin side, Here you can see the list of blog management tabs.

Now configure **Blog listing** page, update the settings as per below data

Leading Column: **"1"**
Leading Limit Items: **"2"**
Leading Image Width: **"950"**
Leading Image Height: **"550"**
Secondary Column: **"2"**
Secondary Limit Items: **"4"**
Secondary Image Width: **"950"**
Secondary Image Height: **"550"**
Show title or not, etc **"Configure"**

Now configure **Item Blog setting** page, update the settings as per below data

Item Image Width: **"950"**
Item Image Height: **"550"**
Show Description or not, etc **"Configure"**

Now Create **Blog Content**

The blog content includes category and blog items so firstly, you need to create category structure for the blog platform. Create **New Category**

Go to the **"Ps Blog Management » Categories Management"** panel, create new category and configure it, Refer the screenshot below.(Also you can update the existing category from here)

Create New **Blog Item**

Open the "Ps Blog Management » Blogs Management" panel, Here you can see list of all created blog items, you can edit any blog item or hit the "New" icon to create new blog item.

Adding new blog item, assign category, add main & thumbnail images, update intro text and full content for the blog item then save.

Manage **Blog Comment**

On the blog detail page, you can enable or disable the comment form in the "Blog Daskboard" configuration panel. When enabled, user can comment on the blog, and you can manage the comments from back-end. To do that, go to: Ps Blog Management » Comment Management

You can publish or disable any comment, edit comment or add new comment.

Now follow the step to add blog link in your Main Menu. Click on "Module".

Search menu module then configure it

Click on add to add your link in your Menu list

Add new link with name 'blog'

then add this blog url behind your store url

Copy the below code and paste in link tab.

```
?fc=module&module=psblog&controller=list
```

Step 4 : Image Settings

Back to Top ^

Our live demo uses the following image sizes for product in product information page.

So it's suggested to edit a product image size parameters.

Go to **Design > Image Settings** and update image size for your store.

Refer below screen shot for it.
